## THE MENTORING PROGRAMME

❖ The state network of contact points relating to women and work has made an important contribution to the development of skills and the promotion of equality for women at work. It is funded by the Ministry of Economic Affairs, Labour and Tourism Baden-Württemberg.

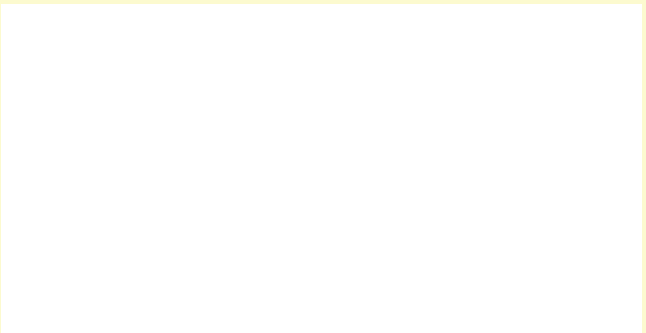

The mentoring programme is an additional element of the network of contact points relating to women and work aimed at women with a migration background so that they can integrate more easily into the labour market in Baden-Württemberg. This takes into account the professional interests and qualifications of the mentees as well as the need for companies to attract new specialists.

---

*We require more women with  
a migration background who can  
successfully progress in the world  
of work.*
